collection advantages

Haali ECO – 100% recycled

The taupe-colored chair shell from the Haali collection is made from recycled materials. This version was created with sustainability in mind—the seat shell is made of 50% post-industrial recycled plastic and 50% post-consumer recycled plastic. Haali ECO combines functionality with environmental responsibility, perfectly meeting the needs of modern, conscious projects.

The Haali ECO chair in taupe is made of 100% recycled material. Due to the properties of the reclaimed material, subtle variations (irregularities) in shade may appear on the surface of the chair.

flexible and comfortable seat

The buckets of the chairs are made of plastic with added fibreglass, which makes them flexible and durable. Haali chairs come in two bucket versions: with or without armrests. There is also the option of an upholstered seat pad.

szeroki wybór baz

Krzesło Haali występuje w siedmiu wariantach podstawy, co pozwala dopasować je do różnych przestrzeni i funkcji. Do wyboru są trzy wersje na bazie prętowej: na stopkach, na płozach lub na kółkach. Dla większej mobilności dostępne są także wersje obrotowe – na krzyżaku 4-ramiennym lub 5-ramiennym z kółkami. Uzupełnieniem oferty jest wariant na tapicerowanej podstawie, który nadaje meblowi elegancki, stacjonarny charakter.
