collection advantages

Haali ECO

The taupe-colored chair shell from the Haali collection is made from recycled materials. This version was created with sustainability in mind—the seat shell is made of 50% post-industrial recycled plastic and 50% post-consumer recycled plastic. Haali ECO combines functionality with environmental responsibility, perfectly meeting the needs of modern, conscious projects.

flexible and comfortable seat

The buckets of the chairs are made of plastic with added fibreglass, which makes them flexible and durable. Haali chairs come in two bucket versions: with or without armrests. There is also the option of an upholstered seat pad.

wide choice of bases

The Haali chair comes in seven base variations to suit different spaces and functions. There is a choice of three versions on a bar base: on feet, on skids or on castors. For greater mobility, swivel versions are also available – on a 4-arm crossbar or 5-arm crossbar with castors. Completing the range is a variant on an upholstered base, which gives the furniture an elegant, stationary character.
