# collection advantages

## Haali ECO – 100% recycled

The taupe-colored chair shell from the Haali collection is made from recycled materials. This version was created with sustainability in mind—the seat shell is made of 50% post-industrial recycled plastic and 50% post-consumer recycled plastic. Haali ECO combines functionality with environmental responsibility, perfectly meeting the needs of modern, conscious projects.

The Haali ECO chair in taupe is made of 100% recycled material. Due to the properties of the reclaimed material, subtle variations (irregularities) in shade may appear on the surface of the chair.

## flexible and comfortable seat

The buckets of the chairs are made of plastic with added fibreglass, which makes them flexible and durable. Haali chairs come in two bucket versions: with or without armrests. There is also the option of an upholstered seat pad.

## wide choice of bases

The Haali chair comes in seven base variations to suit different spaces and functions. There is a choice of three versions on a bar base: on feet, on skids or on castors. For greater mobility, swivel versions are also available - on a 4-arm crossbar or 5-arm crossbar with castors. Completing the range is a variant on an upholstered base, which gives the furniture an elegant, stationary character.
