## fun with form

Jelly is a modular seating system designed for dynamic spaces that change function throughout the day. Its soft, organic form, inspired by the shape of a jelly, conveys comfort and ease of use. The concept of "fun with form" encourages natural interaction and flexible use of space – modules can be freely combined and rearranged to create configurations tailored to users' needs.

Jelly is also a responsible choice: its rotomoulded base ensures durability and resistance to intensive use. No upholstery staples are used, making disassembly and recycling easier, extending the product's lifespan, and reducing the need for replacement.

# collection advantages

## rocking base

The JE S model is available with an optional swivel base with rocking function. The seat rotates effortlessly through 360°, while the gentle rocking motion promotes relaxation and stimulates creativity. This solution is suitable for relaxation and recovery areas, as well as for work or meetings, combining comfort with subtle movement.

## four types of bases

Jelly seats are available in four base options to suit different spaces and uses. Each base suits different needs - from stable solutions to more mobile and comfortable options.

**base on feet** - a stable and classic solution, ideal for everyday use

**base on casters** - provides mobility and safety thanks to a lock when sitting down

**swivel base** - increases functionality and freedom of movement

**swivel base with rocking function** - supports natural body movement and promotes relaxation

## flexible modularity

The collection features four individual modules: a seat with a backrest, a corner backrest, a pouf, and a pouf with a tabletop. Each module, set on legs, can be easily combined with others, allowing for endless configuration possibilities.
