collection advantages

biophilic design

Inspired by the appearance of trees, the Tres hanger can become the perfect addition to a variety of interiors: from minimalist and modern offices to warm and stylish restaurant spaces.

durability and ecology

The plastic parts of the Tres:poly hanger are made of polyamide and fiberglass. A key feature of polyamide is its strength and durability. Additionally, the polyamide used in the components is derived from recycled post-industrial plastic.

natural wood

The solid bleech wood from which Tres is made emphasises the natural character of the hanger and warms up interior. Combined with black elements, it creates a modern and distinctive product.
