

volo

VO 22X

: product card

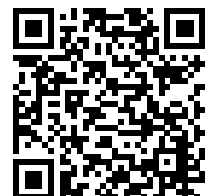

The word "Volo" in Italian means "I fly," and symbolizes the **lightness, mobility, and freedom** that define the collection. Inspired by minimalist design, Volo combines elegance, durability, and efficiency. Every detail is thoughtfully crafted to optimize materials and reduce waste – without compromising strength or structure.

With its lightweight construction, stackable design, and the ability to connect in rows, the Volo collection is ideal for conference rooms, auditoriums, public spaces, and any environment that requires quick rearrangement. The range also includes benches available in 2-, 3-, 4-, and 5-seater versions, with or without an integrated tabletop.

collection advantages

Lightness. Freedom. Mobility.

The word Volo comes from Latin and means “I want.” In a broader sense, it evokes the idea of flight – a symbol of lightness, movement, and freedom. These values are embodied in the chair itself: its slender frame and perfectly balanced proportions give it a visual lightness that blends harmoniously with any space. Thoughtful design ensures the form remains subtle while maintaining full functionality.

colors that create atmosphere

Volo benches are available in five carefully selected color combinations that bring energy to the space and highlight its unique character. The seats are made from high-quality materials, ensuring not only durability but also refined design. Additionally, the surfaces are easy to keep clean, making Volo an excellent choice for public areas, waiting rooms, and healthcare facilities.

freedom of choice

Volo benches offer extensive configuration possibilities, making them suitable for a wide range of environments – from waiting areas to relaxation zones – while maintaining exceptional design and comfort.

Bases – Choose from three base types, each emphasizing the character of the interior. Among them, the B5TL base, fixed to the floor, is an excellent choice for high-traffic spaces.

Armrests – Available with or without armrests. The integrated design ensures a cohesive, elegant look while making it easier to stand up. Additionally, a practical tabletop can be placed between the seats – perfect for personal accessories.

Backrests – Offered in three versions: plastic, upholstered, or breathable mesh, which adds lightness and enhances comfort.
