

GREEN PARK OFFICE

Who we are?

We are a family-run production company that, through the idea, enthusiasm and work of the entire team, has transformed from small carpentry into a office furniture and acoustic solutions manufacturer. We create products in cooperation with creative designers and through rigorous selection of each element of our products to guarantee your satisfaction and comfort even during long hours of use.

Mission statement

Bejot is a company, where the human being is put first above all. His needs, comfort and feeling of aesthetics are for us priorities. We want to be a partaker and an initiator of changes unfolding within the current work conception model as well as an evolution in the field of creation of human friendly spaces for learning, work and some rest.

Our mission is to bring the relations between the human being and the space together and to bring about a harmonious relation between these two things. Nevertheless, we attach a great importance to capturing the beauty in everyday objects which establishes a kind of dialog between the pure form and the functionality.

What is GREEN PARK OFFICE ?

For many years we have been inexhaustibly searching for the solutions that facilitate creating spaces that are friendly to people. As a result of a great deal of researches, tests and a cooperation with the renowned designers, inter alia, Maciej Karpiak or Dymitr Malcew – the Green Park Office by Bejot has been developed – a holistic concept compliant with the Biophilic Design philosophy.

The Green Park Office consists of several products that are supposed to function independently, however when combined together, they create a perfect office. It is a modern and innovative concept, which will take quality of work in the office to a quite new higher level.

Familiarise step by step with our solutions and renew your contact with the Nature.

We were inspired by nature and its ergonomic solutions.

To make sure that everything, like in the park, has its own place, we have developed a group of ideal products.

We have created the concept to bring your nearby park to the edge of your desk.

Why is the idea of the Green Park Office so **important** ?

* Prof. Sir Cary Cooper, *Human Spaces Report: Biophilic Design in the workplace.*

LANDSCAPE

1. It responds to the contemporary problems of employees working in office buildings in the city center often in open space areas, such as noise or lack of privacy.

2. It allows you to create a place that on the one hand ensures performance of planned tasks and comfort of work, and on the other stimulates creativity and increases employee efficiency.

3. It supports working in a group that is so important in creating new ideas and continuous development of the company.

4. The need for closeness to nature exist within us forever. People feel better in rooms that mimic the environment.

4 ASPECTS of ergonomic space

in the first place, take care
of the **BIODYNAMIC** sitting

...what is it?

It is one that **protects the disks** through the ability to move the seat in many areas and **activates the muscular system**. It guarantees:

- maintaining the correct posture while sitting,
- increasing energy and resistance to infections,
- maintaining a positive attitude,
- increasing employee productivity.

Familiarize yourself with the **sitting & standing** philosophy and choose a model that allows you to work in both a sitting and standing position. This solution can also be used in receptions and waiting rooms, where after a long journey you can drink standing coffee.

Let yourself and others choose.

tame the noise and take care
of the **ACOUSTICS** around you

All the sounds around us can cause a drop in concentration, headaches, irritability. Nevertheless, you can remedy this while taking care about **the acoustics of the interiors**, in which you stay. There is a great deal of the solutions:

- acoustic wall panels,
- suspended ceiling panels,
- free-standing panels,
- the sound absorbers.

Would you like to improve acoustics of the interior under a watchful guidance of a professional?

Contact with us and use an assistance of our acoustician.

rebuild your contact with nature in accordance with the idea of **BIOPHILIA**

Enter plants or elements that imitate nature to the interior of the office.

In improving the comfort of the interior and taking care of your well-being and **increasing the efficiency of work** will help you:

- the references to the nature and solutions that enable to enhance a quantity of the plants in the spaces,
- wooden elements and natural fabrics,
- colours inspired by nature.

create the perfect space for the free development of **CREATIVE TEAM**

You have taken care for the interiors and biodynamical work forms, and what next?

Just improve an atmosphere in your team. Transfer your team from a conference room to the less standard meeting spaces and see how:

- creativity of the employees is reborn,
- the atmosphere at work improves,
- improves teamwork,
- the sense of security and self-confident increases,
- the problem is solved faster.

Create with us the space, where everybody feels safe and on an equal basis with the others. Learn the solutions, which subconsciously increase creativity and make that everybody will share his/her even the most non-standard idea.

Designed for **your health**

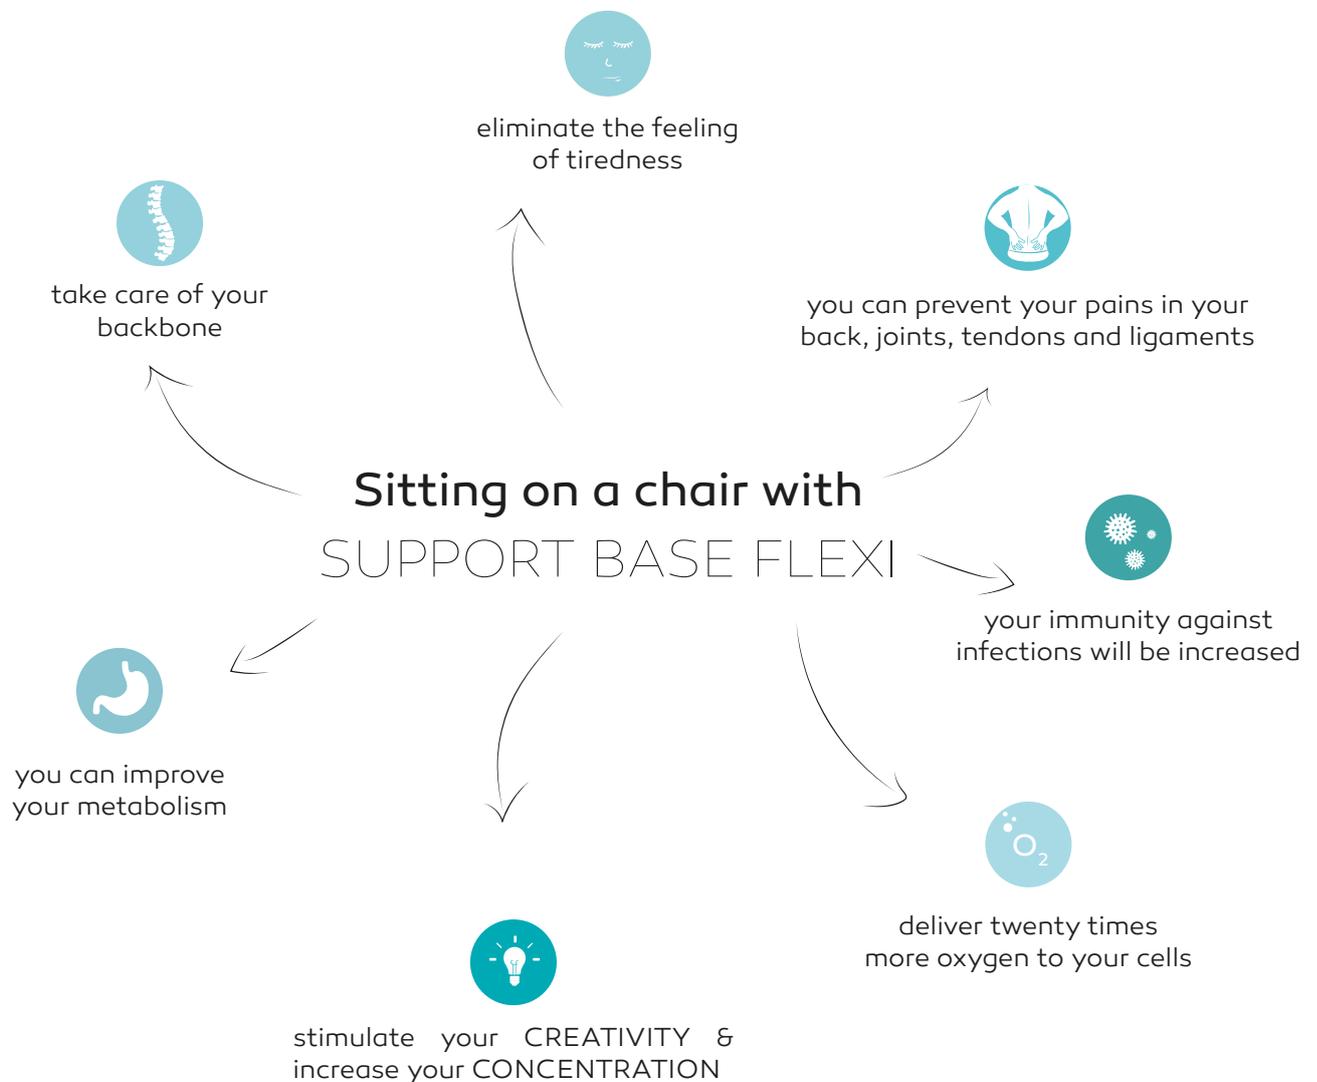

ACTIVE

SUPPORT BASE FLEXI

Owing to **SUPPORT BASE FLEXI** you move even when sitting. Our solution activates the micro-movements of muscles and thereby induces spontaneous changes of posture. These little changes are a response to your natural need of movement, which directly translates into positive effects, for example it improves your blood circulations by oxygenating your cells. Office workers who use **SUPPORT BASE FLEXI (SBF)** are more active both physically and mentally, they feel better and are more efficient.

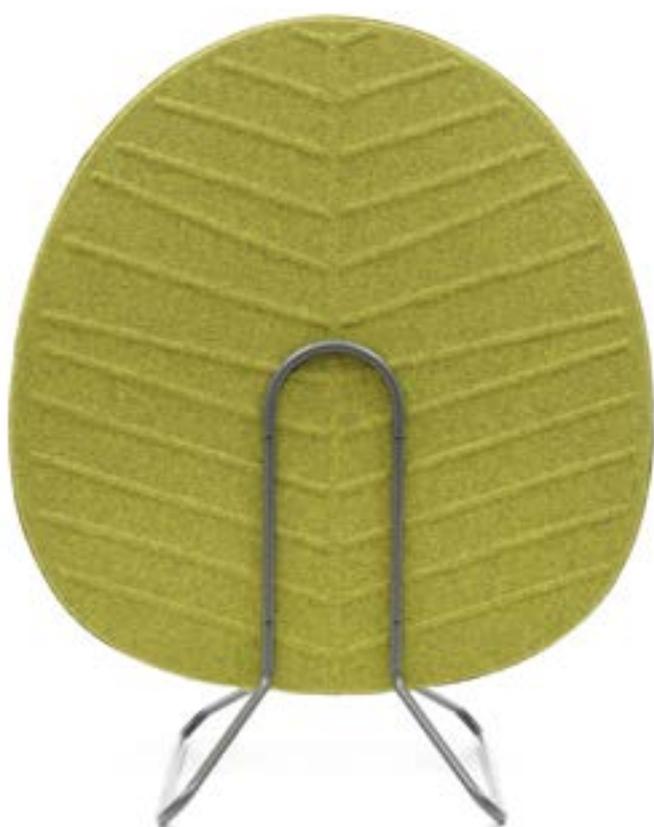

SUPPORT BASE FLEXI can be used in every single swivel chair made by Bejot.

THE SOUND **of silence**

Silent Blocks is an acoustic novelty, thanks to which choosing the right shape of the panel inside will become child's play without giving up the perfect acoustic parameters. The lightness of the panels makes them ideally suited not only as wall panels, but also ceiling panels, and will allow you to create countless creative designs. Get creative with the form of Silent Blocks and show that the acoustics do not have to be boring.

ACOUSTIC PEAK

Glass, concrete, metal – these materials dominate in every modern office building, at the same time disrupting the interior acoustics. One of the solutions for this problem are minimalistic, innovative, and having unprecedented acoustic properties sound absorbers ACOUSTIC PEAK, that will effectively silence any interior.

U_FLOE

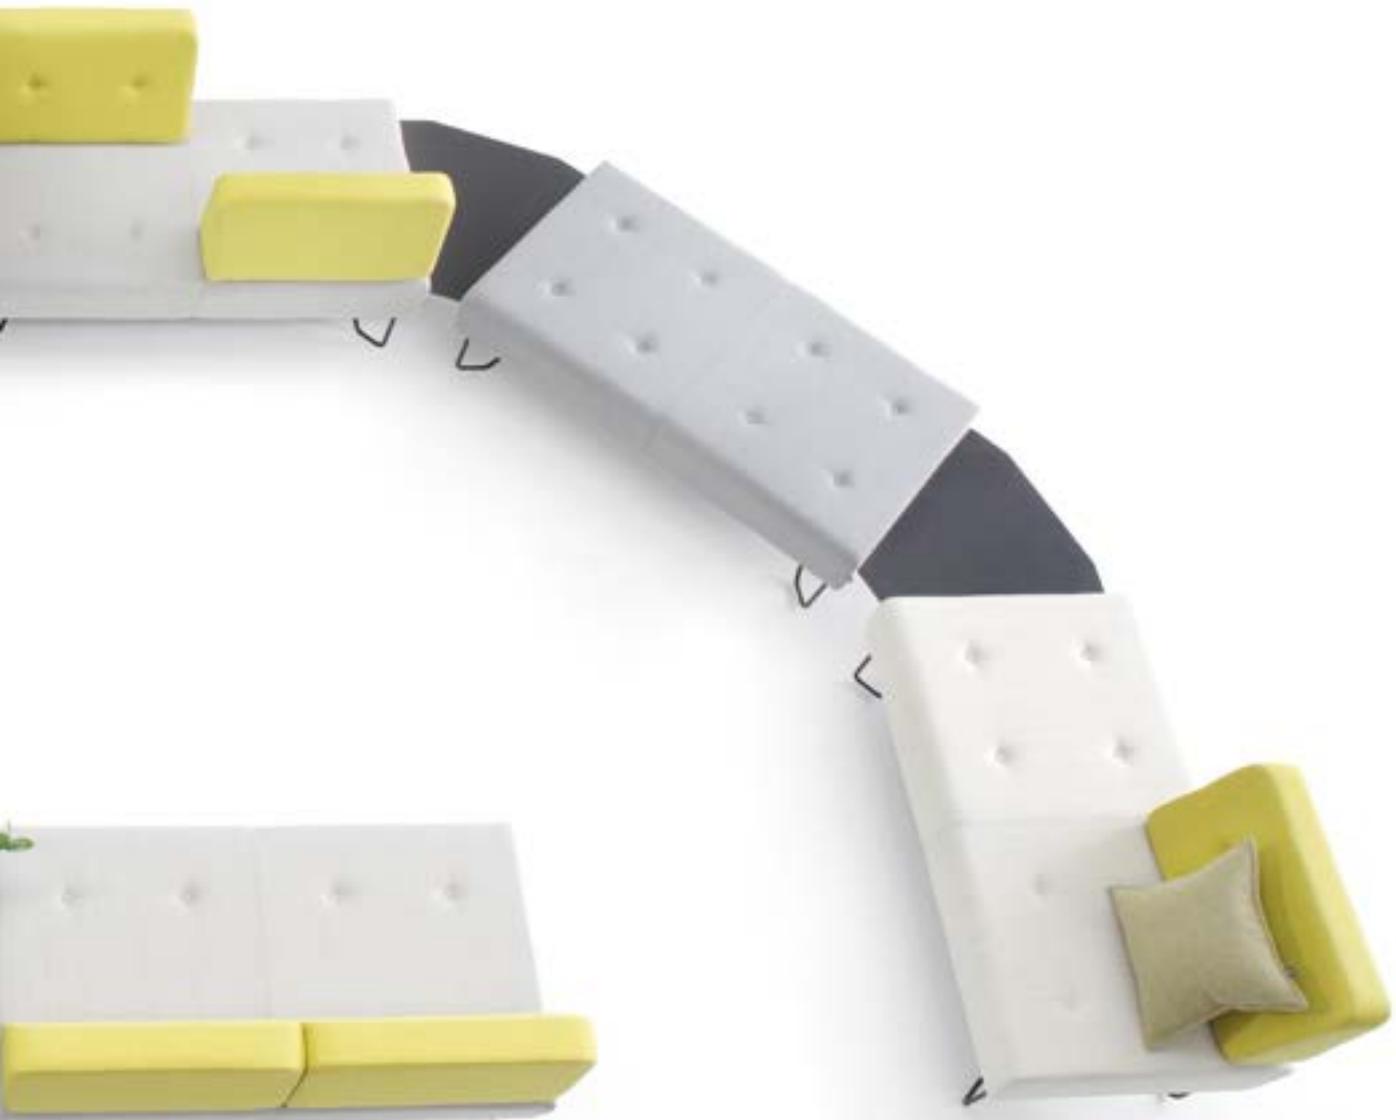

design:
Studio Grajkowski

ALL DIRECTIONS **of space**

What distinguishes the U_FLOE collection is its modularity that enables making an infinite number of arrangements with different shapes and dimensions. It is well thought-out in detail and designed for home interiors, lobbies, waiting rooms, chill zones, meeting points, restaurants, receptions and public spaces.

CREATE your **perfect space**

When creating new collections, we want to emphasize the variability and dynamics of our products. What makes the U_FLOE collection particularly special is the modularity that allows you to create infinite quantities of systems with different shapes and dimensions.

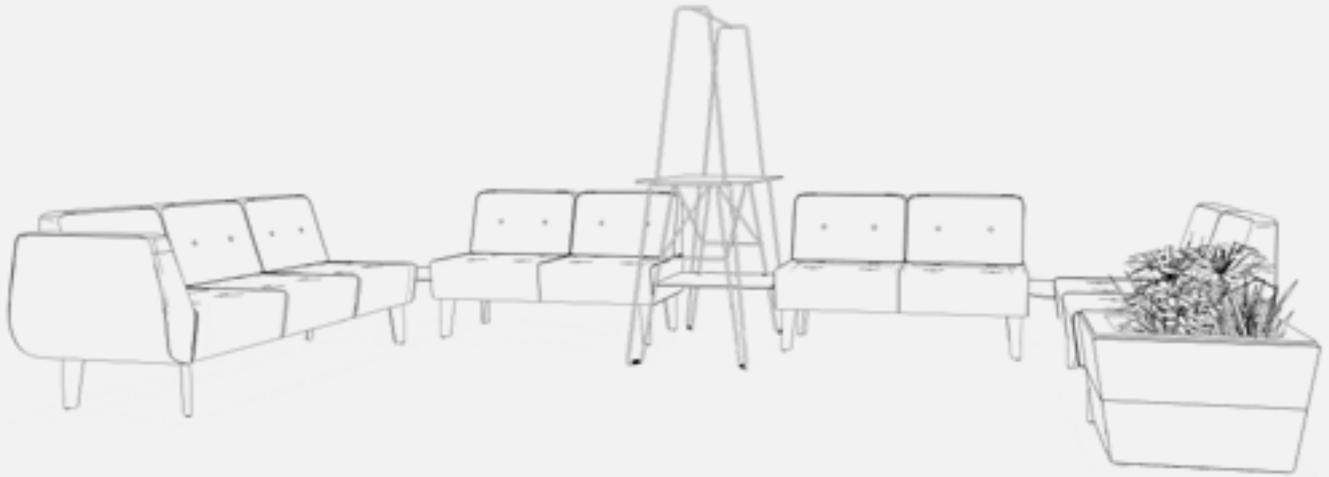

When composing a set of furniture, it is worth to create space depending on their function and place of use:

SOCIAL (CLUE) – improving building interpersonal relations and communication through sitting face to face, ideal for the space of modern conference rooms, meeting places for teams, relaxation zones, and school spaces.

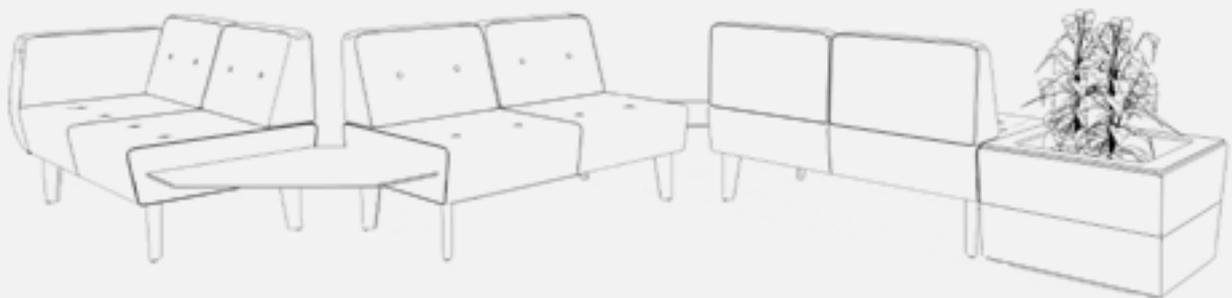

UNSOCIAL – allowing arrangement of space where people do not have eye contact with each other, performing best in interiors such as lounges, receptions, waiting rooms.

SOCIAL

UNSOCIAL

TREEHOUSE

TH

THINK OUT **of the box**

TREEHOUSE is an icon of carefree childhood. The place where everything is possible, and dreams come true. There are no limits, there is only unlimited creation. Modularity and mobility are key features of Treehouse. Inspired by nature it brings the outside world to the workplace.

BEACHHOUSE

BH

BHW

GET **the privacy**

BEACHHOUSE is a design based on the Biophilic Design philosophy. It introduces a positive summer atmosphere to the interiors as it refers with its shape to the hooded beach chairs. Ensures a common place for sitting therefore it helps its users break the ice and enables to determine a harmonious line of action. In it Our idea will be presented more freely and specifically, and solving problems will become more pleasant.

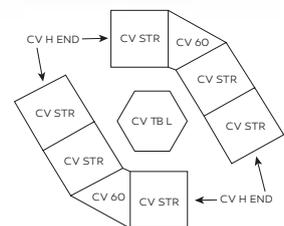

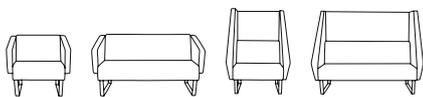

TREEHOUSE

CAVE

design:
Dymitr Malcew

COMFORTABLE **shelter**

CAVE – here employees find out how important they are to their organization; Cave meets our needs; gives a sense of security and brotherhood, it is the perfect place to hold a conversation. Cave system was designed to provide comfort, convenience and silence. Cave is a place that provides shelter and brings people closer, a place where you can discuss your strategy.

APPRECIATE **discretion**

In the office, there is a lot going on, and it can be noisy and dynamic. That is why a space in which it is possible to Focus and think is so important. QUADRA SHA and QUADRA PHONEBOX are a solution. QUADRA blocks create a place where we can seek shelter from office noise, converse in peace or Focus on a task.

SOCIAL SWING SINGLE

design:
Maciej Karpiak

SSO

WORK **different**

It transfers the atmosphere of the park to the office. Social Swing creates an informal meeting place that stimulates creativity. This is the place where the most inspiring and surprising ideas can arise in an atmosphere of free discussion. Gentle rocking greatly affects the silencing of emotions, stimulates concentration and promotes efficiency. Social Swing can be configured in any way using the benches, suspended chairs or tables.

SOCIAL SWING DOUBLE

SS D

SOCIAL SWING ROUND

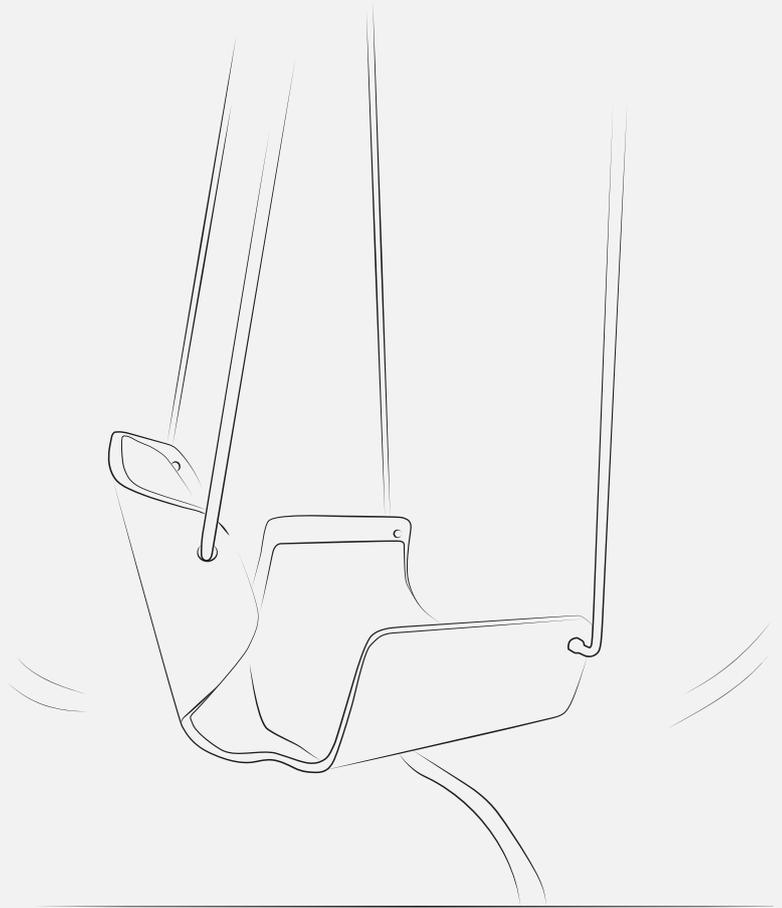

SS R

Let's SWING & be creative

Advantages of Social Swing:

1. supports the production of **endorphins**,
2. helps in the creation of **new neural connections**,
3. allows you to move and develops better **orientation in space**,
4. **relaxes**,
5. calms the **deep feeling**,
6. stimulate **creativity**,
7. it developed in accordance with the idea of **biophilic design**,
8. supports **team building**,
9. can be a **source of inspiration**.

Do you know, that...

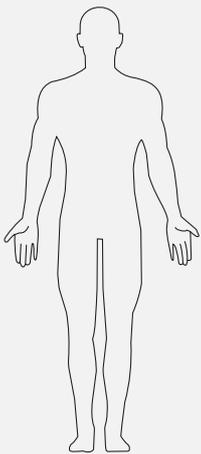

...a peaceful swinging movement is beneficial for the **PHYSICAL**, **SOCIAL** and **COGNITIVE** development and has therapeutic benefits. Suspended seats promote movement and perceptual abilities, spatial awareness, general fitness, social interactions and sensory integration, including the development of coordination and balance. Social Swing also teaches cooperation and improves the atmosphere in the team.

Through the swing movement, the labyrinth and the sense of proprioception are stimulated, thereby increasing the number of new neural connections. In addition, the feeling of calm caused by the use of Social Swing increases the production of endorphins - the hormone of happiness, which has a positive effect not only on further work, but also on the effectiveness of rest.

Source: Frost, Joe L., Pei-San Brown, John A. Sutterby, Debora Wisneski *Function and Value of Swings: The Benefits of Playground Swings*

Take care of **your senses**

The organs of the **SENSE OF EQUILIBRI** is located in the labyrinth, i.e. in the inner ear. It allows you to feel the position of your own body in space. All information received from the labyrinth is sent to the brain's equilibrium center. There they are compared with information from other senses, in particular the sense of proprioception.

PROPRIOCEPTION (or kinesthesia or deep feeling) is responsible for positioning the various parts of the body in space. Proprioceptors are located in muscles, fasciae, tendons, ligaments, joint capsules and periosteum.

The main consequence of improperly functioning kinesthesia is the weakening of the sense of balance, coordination of movements and body awareness.

The exercises stimulating the vestibular-proprioceptive system include, among others, **rocking, swinging movements** with the whole body and head.
